Big Volume, Big Taste.

If your customers really can't get enough extra crispy wholly delicious fried foods, then you're going to need the BKG® BLG-FC fryer. This extra-large gas-operated auto-lift fryer can take natural or LP gas and is designed for high volume, simple operation, and long life. The BLG-FC fryer cooks up to 24 lb (10.8 kg) of product with our optional grande basket in one cycle and holds 75 lb (34 kg) of oil.

Open-vat fryers are unbeatable for producing extra-crispy exteriors and tender interiors on a variety of fried foods but the BLG offers features which, taken together, you won't find anywhere else. Easy to use process controls can be programmed for true one-touch cooking. The auto-lift basket ensures that food is removed from the oil exactly when it is completely cooked. The auto-lift feature also keeps employees safe from hot splattering oil.

These designs save you money as well. The amazing efficiency and fast recovery times of the BLF series gas fryers are realized by the placement of the heating elements and igniter box completely inside the vat with oil flowing freely around them. The built-in filtration system keeps oil fresh and extends its usable life. This keeps your food tasting great every time. With the push of a button and the twist of a handle, filtering oil is easy and safe. A cold zone in the vat collects breading fall-off, keeping oil fresh and clean. The patented quick-disconnect allows for easy removal of the filtering vat.

Combine this fryer with a BKG hot case and you'll always have enough of the delicious, extra crispy products your customers crave!
